[LinkedIn](#) — [GitHub](#) — [LeetCode](#)

Summary

B.Tech Computer Science student with a strong foundation in programming, data structures, and software development. Skilled in C++, Python, web development, and problem-solving. Interested in building intelligent systems and applying theoretical knowledge to real-world applications.

Education

SRM IST, Ghaziabad

B.Tech – Computer Science and Engineering

St. Joseph's Residential School

2023

Class XII – CBSE (PCM), Sriperumbudur, Kanchipuram

Percentage: 65.6%

St. Joseph's Residential School

2021

Class X – CBSE, Sriperumbudur, Kanchipuram

Percentage: 66.2%

Experience

Software Intern — UbiqTech Consulting Private Limited

Full Stack & AI/CAD Systems Intern — Product

Contributed to an AI-powered manufacturing quotation platform generating instant quotes and DFM insights for CNC machining, laser cutting, and pipe bending from CAD/engineering files (STEP, PDF, DXF, DWG).

Built a PoC integrating a pretrained AAGNet Graph Neural Network with the FastAPI backend to detect manufacturing features from STEP models, and enriched AI model prompts with this structured context for AI-assisted validation.

Improved CNC machining time estimation with process-aware, operation-specific minimums, and refined quotation workflows to combine AI-assisted validation with deterministic cost logic.

Developed REST APIs with FastAPI, Pydantic, SQLAlchemy, and PostgreSQL, and enhanced Next.js/React quotation workflows with real-time AI validation status and quote recalculation.

Tech Stack: Python, FastAPI, PostgreSQL, Next.js, React, TypeScript, Tailwind CSS, AI Services, Graph Neural Networks, OpenCASCADE, Redis.

Projects

AniCare

Dec2024

Present Group Project — React.js, HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Render, Vercel Pet Healthcare & AI Domain

Built an intelligent pet care platform allowing users to create pet profiles.

Provided AI-driven personalized care suggestions for health and treatment.

Wayfari — Find Your Perfect Travel Buddy

May2026

Full-Stack Personal Project — Compatibility Matching, Real-Time Chat, GSAP, Framer Motion, OAuth

Built a full-stack travel companion web app connecting like-minded travelers through smart compatibility matching, real-time chat, trip planning, and safety features.

Developed a compatibility algorithm based on travel style, hobbies, and music taste, with percentage-based match scores and destination/group-size filters.

Implemented real-time chat with unread indicators, trip itinerary management, and a Safety Hub with SOS alerts, trusted contacts, and check-in intervals.

Designed a premium black & white UI with GSAP scroll animations, Framer Motion transitions, and Google/GitHub OAuth plus email/password authentication.

PawAlert — India's 911 for Stray Animals

May2026

Full-Stack Project — Next.js, TypeScript, Supabase, Gemini Vision AI, Mappls, grammY Telegram Bot

Built an AI-powered stray animal rescue coordination platform enabling citizens to report injured animals in 60 seconds and track rescues in real time.

Integrated Google Gemini Vision AI to auto-triage injury severity and generate medical notes from submitted photos.

Used Supabase (PostgreSQL + RLS) to manage users, rescue tickets, and NGO logistics, and Mappls for live tracking maps and route navigation.

Built a grammY-powered Telegram Bot (@PawAlertBot) for citizen reporting, driver dispatch, and admin approvals with role-based commands.

AI-Fake-News-Detector

Personal Project — Python, scikit-learn, PyTorch, Flask

Built a fake news detection and credibility assessment system using linguistic analysis, semantic modeling, and multi-source evidence aggregation.

Trained classical ML and Bi-LSTM models (Logistic Regression, SVM, Random Forest) for deterministic, reproducible credibility predictions.

Implemented live RSS integration, URL-based article extraction, and claim-based verification against trusted news sources.

Awards

Web3 Hackathon - HackIndia

Aug 2024

Ranked 11th out of 40 teams at SRM IST.

Auto Coder Competition - GDSC

Sep 2024

Ranked 5th, organized by Google Developer Student Clubs.

Certifications

● OracleCertifiedFoundationAssociate(OCIAI)	Nov2025–Nov2027
● HackerRankJavaCertification	Oct2024
● HackerRankPythonCertification	Sep2024
● FlipkartGRiD6.0	Aug2024
● 80DaysofGenAIMastery–Udemy	Apr2025
● HackIndiaHackathonParticipationCertificate	Aug2024
● JPMorganChase–SoftwareEngineeringJobSimulation(Forage)	Jan2026

Skills

Languages and Frameworks: JavaScript, HTML, CSS, React, Node.js, Express.js, Next.js

Tools and Technologies: MongoDB, SQL, Render, Vercel

Technical Skills: Data Structures and Algorithms

Programming Languages: C++, Java, Python, C

Spoken Languages

English (Professional Working Proficiency) • Hindi (Native Proficiency) • Tamil (Professional Working Proficiency)
